

Scissor Lift

Project: Flooring

Category: Waterproofing & Slip Resistance

Completion

Date: August 2006

Product: TUFF STUFF

Job Description

The wooden floor of this scissor lift had recently been replaced. The client required that the flooring be sealed for waterproofing along with a non-slip coating to meet Work Place Health as Safety requirements.

The floor was primed with 251 Primer and then a 3mm coating of TUFF STUFF was sprayed on. The client is more than happy with the outcome and benefit of using the Rhino Linings flooring system.
